

JOB SPECIFICATION – INFRASTRUCTURE SYSTEMS ENGINEER

Location: West London (W10)

Type: Permanent, Full Time

Salary: £Competitive + private healthcare + company bonus + pension + gym membership

A qualified Infrastructure Systems Engineer with at least 3 years' experience is needed within our growing technical team. Frontier Technology is a systems integrator and cloud computing provider based in West London. Drawing on over 15 years' experience, we offer bespoke IT solutions, from infrastructure, to data management, to DR & access solutions.

Already a Microsoft Gold Partner and Citrix Partner, the company continues to grow in success and is now looking for a new member to join our friendly team.

The role

- Maintaining our data centres and cloud services
- Providing 2nd and 3rd line support to customers
- Working on infrastructure-related projects

Essential skills

- Minimum of 3 years' experience as an Infrastructure Systems Engineer/3rd line technical support
- Previous experience with the following technologies: VMWare ESX/HyperV, Active Directory, Windows Server 2008/12/16, Citrix, Exchange
- Real interest in new technologies that enhance data centre solutions
- Experience in a customer-facing role (preferable)
- Previous experience in IT services, resellers or system integrators
- Full training will be provided on our bespoke software and systems

Other desirable skills

- SAN storage
- Cisco firewall and networking
- CCNA or CCNP
- Adaptability and flexibility
- Committed to a job well done

Benefits: 30 days holiday, subsidised gym membership, pension, private health insurance, flexible working, bonus, personalised training and certification plan, free attendance to national and international technical conferences.

This is an exciting opportunity to work with an emerging technology provider where there will be great opportunity for career progression. If you are looking for somewhere to enhance your skills, this may be just the place for you!
